DETAILED ACTION

Prosecution on the merits of this application is reopened on claims 1-24 considered unpatentable for the reasons indicated below:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fritzsche, et al (US 4,599,990). Fritzsche, et al. discloses a fryer having a temperature sensor which displays the oil temperature. It would have been obvious to one having ordinary skill in the art at the time the invention was made to let one know if the oil temperature is preferred, just OK, or unacceptable.

Allowable Subject Matter

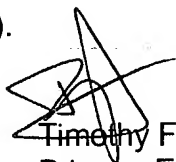

Claims 2-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
